Profile

- Passionate Software Consultant with expertise in both compiled and interpreted programming languages.
- Proficient in Full Stack Web Development, C++, Linux, and Software Project Management.
- Advocate of clean, readable, maintainable and scalable code.
- Strong team player who values teaching and learning in collaborative environments.
- Experienced in various phases of software projects, including design, development, documentation, validation, sprint planning, and client interactions.

Work Experience

Technical Lead / Delivery Architect

Nearform | Remote | March 2024 – Present

- Leading a team of engineers in full-stack development for a client's internal product.
- Responsible for software architecture, sprint planning, daily client interactions, code reviews, and line management.

Senior Consultant(Application Developer)

ThoughtWorks | Chennai, India | November 2021 – February 2024

- Developed frontend features using React and BFF features using Node.js for a leading North American retailer.
- Conducted daily client interactions, requirement analysis, team support, and technical guidance.
- Led frontend development and QA activities.

Senior Software Design Engineer

Visteon Corporation | Chennai, India | April 2021 – October 2021

- Developed audio services in an Android-based vehicle infotainment project.
- Created C++ and Java-based services for operations like volume control and mute settings.

Senior Software Engineer

Visteon Corporation | Chennai, India | January 2019 – March 2021

- Developed Node.js modules, C++ Addons, and shared libraries interfacing between native services and web apps.
- Led a team through development, integration, and validation of an infotainment platform.
- Managed sprint planning, client interactions, and task delegation.

Senior Application Developer

Contus | Chennai, India | October 2016 – December 2018

- Developed HTML5 apps for a vehicle infotainment platform, including multimedia, climate control, and weather apps.
- Built Node.js modules interfacing with device APIs like Network and Bluetooth.

Application Developer

Contus | Chennai, India | September 2014 – September 2016

- Developed WordPress websites, plugins, and REST APIs using Laravel.

Software Developer

Excelanto Technologies | Chennai, India | September 2013 – August 2014

- Full stack development of websites using the WAMP stack.
- Ensured responsive and cross-browser-compatible web designs.
