SKILLS

- **Leadership & Architecture** - Technical Leadership, Software Architecture, Engineering Delivery, People Management, Mentoring, Code Reviews, Client & Stakeholder Management
- **AI Engineering** - AI-Native Engineering, Spec-Driven Development (SDD), BMAD Methodology, Github Copilot, Cursor, RAG, LLMs
- **Languages & Backend** - JavaScript (ES6+), TypeScript, Node.js, Express, Fastify, Shell Script
- **Frontend** - React, Next.js, Redux, HTML5, CSS3
- **Cloud & DevOps** - AWS, GitHub Actions, Docker, Linux, CI/CD
- **Databases** - PostgreSQL, MySQL
- **Testing & Engineering Practices** - Test-Driven Development (TDD), Unit Testing, Jest, Node Test Runner, Agile, Scrum

PROFILE SUMMARY

- Technical Lead with **13+ years of experience** designing, building, and delivering software across full-stack web, backend, and cloud technologies, with expertise in **technical leadership, architecture, engineering delivery, client engagement, and people management**.
- Experienced in **AI-Native Engineering and Spec-Driven Development (SDD)** using BMAD, GitHub Copilot, and Cursor, integrating AI-assisted development into the software development lifecycle.
- Strong hands-on expertise in **JavaScript, TypeScript, Node.js, React, and AWS**, with a focus on scalable architecture, engineering quality, maintainability, and pragmatic delivery.

WORK EXPERIENCE

Technical Lead / Delivery Architect

Nearform | Remote, India | Mar 2024 – Present

- Lead a team of **four developers and one QA engineer** in the end-to-end development of a client's internal product, owning **technical leadership, solution design, architecture, and delivery** for a product built from the ground up.
- Drive **AI-Native Engineering and Spec-Driven Development (SDD)** using the **BMAD methodology**, integrating AI-assisted development across the software lifecycle and achieving **4X faster feature delivery** compared with the previous development approach.
- Own the **overall application architecture**, making technology and framework decisions and designing scalable APIs and backend services, while establishing engineering standards and maintaining **95%+ unit-test coverage** through code reviews and consistent development practices.
- **Manage and develop engineers** through feedback, mentoring, career development, and work allocation; own delivery commitments, partner with Engineering and Product Managers on quarterly releases, and contribute to the engineering talent pipeline through **100+ technical interviews**.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued – Dec 2025 | Expires – Dec 2028

EDUCATION

MBA – Systems Management

University of Madras

Chennai, India | Jul 2021 – Jun 2023

B.Tech. – Information Tech

Aalim Muhammed Salegh College of Engineering

Chennai, India | Sep 2009 – May 2013

Senior Consultant(Application Developer)

ThoughtWorks | Chennai, India | Nov 2021 – Feb 2024

- Led a team of **three developers and one QA engineer** delivering frontend and BFF checkout features for a high-scale North American e-commerce platform serving **millions of unique visitors each month**.
- Designed **feature-level solutions across React and Node.js BFF**, collaborating with the client architect and engineering team on approaches, requirements, and acceptance criteria.
- Led delivery through **task allocation, code reviews, technical guidance, test strategy, and release coordination**, ensuring engineering quality and timely delivery.

Senior Software Design Engineer

Visteon Corporation | Chennai, India | Apr 2021 – Oct 2021

- Developed **Java-based audio service APIs** integrated with a C++ layer for an Android-based vehicle infotainment system, enabling application-level control of volume, mute/unmute, and audio focus.

Senior Software Engineer

Visteon Corporation | Chennai, India | Jan 2019 – Mar 2021

- Built and maintained features for a QNX-based vehicle infotainment platform, developing Node.js modules and C++ Addons bridging Chromium-based web applications with native C++ services.
- Led **three developers, validation engineers, and an integration engineer** in API development for climate control, multimedia, and settings, providing technical guidance and coordinating **cross-layer integration, release planning, and validation**.

Senior Application Developer

Contus | Chennai, India | Oct 2016 – Dec 2018

- Developed HTML5 and Node.js applications for a QNX-based vehicle infotainment platform, building multimedia, climate control, and weather applications and integrating Node.js modules with device APIs such as Network and Bluetooth.

Application Developer

Contus | Chennai, India | Sep 2014 – Sep 2016

- Developed web applications across multiple client projects using PHP/Laravel and WordPress, building custom websites, plugins, and REST APIs.

Software Developer

Excelanto Technologies | Chennai, India | Sep 2013 – Aug 2014

- Developed full-stack web applications using the WAMP stack, implementing responsive and cross-browser-compatible web interfaces.
